

Explore Your Future! With Junior Achievement and the Sheboygan County Chamber

7th and 8th graders explored career opportunities with JA and the Sheboygan County Chamber.

Junior Achievement and the Sheboygan County Chamber partnered for the second year for “Explore Your Future 2025” at Lakeshore College March 5-6. The event provided career exploration opportunities for 7th and 8th graders and was attended by more than 1,000 students seeking inspiration and guidance in planning their futures.

Junior Achievement was on the scene to provide learning materials and programming before and during the event. More than 1,000 students received JA’s “It’s My Job” and “Career Exploration” program materials.

During the event, students discovered their individual personality types, explored careers that align with their unique traits, gained insights into effective personal branding through best practices in social media, mastered the art of making a lasting first impression, and delved into career clusters that piqued their interest.
